# BAR THE DISTRICT

The District is a multi-experience venue for the local community and visitors alike that draws on the creative history of the Harringay Warehouse District and addresses the prominent site location that intersects both Seven Sisters Road and Eade Road.

INSPIRED BY THE LOCAL COMMUNITY'S ADAPTATION TO ECONOMIC AND SOCIETAL CHANGE, OUR DESIGN CAN BE RECONFIGURED TO ACCOMMODATE THE REQUIREMENTS OF THE COMMUNITY ON AN HOUR BY HOUR BASIS.

By day, the scheme acts as a street food market and at night is transformed into a multi-use event space for theatre or music. The scheme in it's entirity focuses on celebrating the community and offering a social hub for spontaneous interaction and creative displays.

The food huts will rest on wheels that can be simply pushed between locations to transform the space depending on the required function. The site fence will be removed for the installation and replaced by static security planters that will hug the food huts depending on the desired mode.

Community, location and sustainability are at the forefront of our design philosophy. As such, we look to utilise local materials in our schemes. Local recycled materials will offer the opportunity to enrich the character of the proposal and will aid embed the development within the urban fabric of the site. Our proposal seeks to utilise local timber where possible.

A GREEN AESTHETIC WILL BE APPLIED TO THE SITE BOTH FOR ECOLOGICAL AND AESTHETIC REASONING'S, TURNING AN EXISTING CONCRETE SITE INTO A LUSCIOUS GREEN SPACE FOR LOCALS AND VISITORS TO ENJOY.

BAR was founded by Michael Buckley and Matthew Rogers in 2018 who focus on the sustainable design of amazing spaces.

Both share a passion for integrating nature into their designs and met on their undergraduate degree at the Oxford School of Architecture. Both have worked for world leading design practices on small and commercial scale projects in nearby Tottenham.
